Assumptions and Questions

Homepage

▼ **Assumptions**

- Checks whether the email address already stored in our database

- Password validity requirements

- Email address validation (formatting) is performed

- Not testing the 'About' hyperlink, but in reality it should navigate to an appropriate page

- Appropriate error messaging if attempt fails

▼ **Questions**

- Where do we store the newly-created data?

- What are the password validity requirements?

Log in page

▼ **Assumptions**

- No 'Forget Password' button

- Data is stored in a secure server

- 'Book a Space' Spaces page is default after logging in

▼ **Questions**

- No button to navigate back to sign-up page - should there be, in case account does not exist?

- How many attempts does the user have at logging in?

- Will their account get locked after x number of unsuccessful attempts?

Spaces page

▼ **Assumptions**

- User can search either/both date boxes

- Space listings show key info

▼ **Questions**

- What is the furthest future date a user can book for?

- Are the date boxes formatted so that a calendar-style entry view appears? Or must the user input the date in the correct format themselves?

- How are search results ordered by default?

New Space page

▼ **Assumptions**

- Price per night set at one currency (£) which cannot be changed

- All fields are required and appropriate error messages occur if not filled out correctly

- Image uploads have size/format restrictions

▼ **Questions**

- Is there a system to filter out spam space listings or keywords e.g. containing swear words/porn/hate speech/other malicious material?

- Is there a limit on the price per night?

- Is there a char limit on the description section?

- Is there a maximum number of images allowed?

Individual Space page

▼ **Assumptions**

- The user can only select one night on the calendar

▼ **Questions**

- What happens if a space request is confirmed by an owner whilst a user is viewing the calendar? Will the page auto-update, or does the page need refreshing first?

- Is there a way to chat with the owner before booking is confirmed?

Requests page

▼ **Assumptions**

- No option to cancel a request made

- No option to change a request, e.g. alter the date

▼ **Questions**

- How are requests stored?

- In the chat function, is there a way to block/filter out offensive/harmful content/spam?

Individual Request page

▼ **Questions**

- How are booking conflicts handled? i.e. what happens if an owner confirms multiple users for the same night?

- What happens to the chat after the booking is complete?

- Are there char limits on chat messages?
